April 5<sup>th</sup>, 2013

Carter Napier  
Administrator  
City of Gillette  
Box 3003  
Gillette, WY 82717-3003

Dear Mr. Napier,

I am writing to ask the City of Gillette's permission to install a Public Warning Siren on City property as part of Campbell County Emergency Management's 2012-13 Public Warning Siren project.

The specific site in question is the City's property at 845 Southern Drive where the city has a water storage tank. I am proposing that the siren be located somewhere at the city's choosing on the north side of that site.

As part of Campbell County's multi-year Public Warning System upgrade, the location of a siren at this site will help infill the warning siren footprint on Gillette's southern side.

The planned installation will include a Whelen WPS-2910 siren mounted on a wooden pole and utilizing a solar power option. The siren is completely self-contained and requires no other supporting services or structures such as power, guy wires, etc. This siren would be identical to those installed on City property in 2011.

Basically, we need permission to put a hole in the ground and then insert our siren pole, and then being allowed future access for maintenance/repairs as necessary.

If the City gives approval, we are expecting this project to be completed by July, 2013.

I appreciate your consideration of this request and stand ready to answer any questions which might arise.

Sincerely,

David King  
Coordinator
