Dear Mayor Tom Murphy or City Council Members:

My son, Dave Lynch, lives at 1800 W 4J (corner of Oakcrest and W 4J) and needs to have a city water line put in to his home. We would like to apply for an exception to the "no city water lines in the county rule." We will pay the fees to install the water line and any tap fees, however we need city approval to do so.

He has been without running water for about a year (previously on a water well of his neighbors) and has been carrying water from his sister's home since early winter. This is really hard for him because he has recently lost his leg to diabetes and is in a wheel chair and/or crutches. He would appreciate all the help he can get since social security disability has turned him down five times and welfare has turned him down twice.

Thanks for your consideration,

Ruth and Dewey Glover
