*This application may be subject to a personal interview by the Mayor and City Council.*

As a civil engineer for the engineering firm of KLJ (Kadmas Lee and Jackson), for the last five years, I have worked continuously with city leaders to address issues by developing solutions to problems that impact various forms of infrastructure. I have been involved in several City of Gillette projects spanning through the planning, design and construction phases. I wish to now apportion my professional practice experience to aid in the common good of the community that my family calls home. I hope to help establish innovative environments and further foster community relationships. As a member of the Public Works and Utilities Advisory Committee I can serve as an informed liaison to negotiate the desires of the City of Gillette with the realities and possibilities of current and future specifications and projects. As cities continue to contend with changing social and environmental conditions my common sense approach will help Gillette's City policies remain progressive, affordable and adaptable.
