Gillette, Wyoming 827167-3003

Project: Means Water and Sewer District Tank Repaint
RE: Mineral Royalty Grant Application

Dear Mr. Hamilton,

The Means Water and Sewer District is applying a Mineral Royalty Grant application to help offset cost incurred by the District to repaint their water tanks.

State Land and Investment Board Rules and regulation and state statute require the District to obtain written review from the City of Gillette since parts of the district are within five miles of the corporate limits.

Additionally, those documents to be prepared by Campbell County as part of the Application Package are being prepared concurrently with their own review process.

The Project will consist of repainting the entirety of the exterior of both tanks (7200 SF), the entirety of the interior ceiling of one tank (700 SF), 50% of the interior walls of one tank (1500 SF), the entirety of the interior floor of one tank (700 SF), and the exterior of the site control building (500 SF). Thank you for your assistance in obtaining the statutory written review

If any additional information is needed, please call at 307-682-8936.

Sincerely,
HDR Engineering, Inc.
