Gillette, Wyoming 827167-3003

Project: Freedom Hills Improvement and Service District – Water Meter and Water system  
Upgrades  
RE: Mineral Royalty Grant Application Review

Dear Mr. Hamilton,

The Freedom Hills Improvement and Service District is applying for a Mineral Royalty Grant to help offset cost incurred by the District to install water meters and replace water mains throughout the district.

State Land and Investment Board Rules and regulation and state statute require the District to obtain written review from the City of Gillette since the district is within five miles of the City of Gillette corporate limits. We would like to request that the application go before council at the February 3<sup>rd</sup> council meeting so we can submit the application to SLIB later in February.

Thank you for your assistance in obtaining the statutory written review.

If any additional information is needed, please call at 307-228-6009.

Sincerely,  
HDR Engineering, Inc.

Justin Starck
