

Los compadres restaurant 1700 west 2nd. St. Gillette wy. 82716 307-682-1101
plan to extend service area.
April-13-2015

We already have a designated patio area that we would like to use or extend as a service area over the months of summer (may throughout September)

Our restaurant space is limited inside and over summers months with tourists in town we had been ask many times if we could serve full meals outside including alcohol beverages.

In our plan like shows in the pictures we can enclosed the same area with same material we already use (wood fence) or witch ever one is required to do so including a swing door with latch on it witch will open to inside of the designated area to not interrupt traffic of people going in and out of our restaurant and also allowing access to handicap patrons.

We have three ramps from the original building back in the pass being one of them the main entrance to the building including handicap access because there is a ramp leading to the parking lot.

No roof structure will be necessary.
