Karlene

Our intended use is just additional seasonal seating and being able to give the guest a option for outdoor dining and drinks weather permitting.

We are looking at having it open only as long as season allows we do have warmers out there for colder evening and extending the summer season as long as we can.

It will be staffed with servers and managers will treat as part of the restaurant.

I have attached the drawing with measurements and pictures

If you need anything further please

Let me know

Thank you

Gary J Score
